Rural Pathways

Typical base build up for pedestrian use

Surface Course
Hand applied and trowelled to a smooth finish by Chameleon Ways certified applicators

Binder/Sealing Course
Laid by others in well compacted layers to a minimum fall of 1.5%

Sub-base
Laid by others in well compacted layers to a minimum fall of 1.5%

Sub-grade

Addabound resin bound paving depth requirements
3mm mix requires a minimum depth of 1/2 inch
6mm mix requires a minimum depth of 5/8 inch
10mm mix requires a minimum depth of 7/8 inch

2 inch depth of 12.5mm binder/sealing course installed in compliance with current DOT specifications

4 inch depth of well compacted non-frost susceptible sub base material installed in compliance with DOT specifications

(optional) geotextile membrane to prevent upward migration of fine soil particles

NOTE: A suitable steel, wood, brick, stone or aluminium edging should be provided to ensure a neat edge detail.

Any advice, recommendation or information given by Chameleon Ways, Inc is based on practical experience and is believed to be accurate at the time of publication, no liability or responsibility of any kind (including liability for negligence) is accepted in this respect by the company, its employees, or applicators.

It is recommended that a certified professional engineer design and develop the proper base structure requirements to support the expected loads and taking into account the climate and site specific conditions which may exist.
